

ABOUT IPASS

iPass delivers global, mobile connectivity as a hosted cloud service, connecting its customers with the people and information that matter the most, on all of the devices they choose to carry: smartphones, tablets and laptops. iPass (NASDAQ: IPAS) is the world's largest Wi-Fi network. By the end of 2015, iPass will have 50 million hotspots in airports, hotels, airplanes and public areas in more than 120 countries across the globe. In the rapidly changing technology of Internet connectivity, iPass is the pioneer in ensuring businesses have unlimited access to unlimited content.

Unlimited Global Wi-Fi Access

iPass Keeps You Connected

iPass is the world's largest Wi-Fi network, offering always-on Wi-Fi access on any mobile device.

- ▶ **Convenient and secure.** With one-click activation, there's no need to remember or expose your credentials in order to connect.
- ▶ **Unlimited Wi-Fi.** With unlimited data on unlimited devices, iPass saves on roaming charges and makes connectivity costs predictable for your company.
- ▶ **Automatic connections.** iPass invisibly connects you to the best hotspot for your needs.
- ▶ **Global hotspot security.** Last mile VPN functionality protects your data where it's most vulnerable: between you and iPass' secure Internet gateway.

Wi-Fi Access, Where and When You Need It

- ▶ Airports
- ▶ Airplanes
- ▶ Train stations
- ▶ Trains
- ▶ Hotels
- ▶ Convention Centers
- ▶ Outdoor venues
