

## Global Connectivity for Your Mobile Workforce

Data is exploding, driven largely by the use of cloud-based applications, the rise of video content, and the increase in file sizes and file sharing. This new business environment makes high-speed, high-quality, ubiquitous connectivity crucial for your team.

Keep your team productive with iPass as your global mobile connectivity solution. iPass is a cloud-based service that provides seamless, secure, intelligent connectivity, powered by the world's largest Wi-Fi network. iPass keeps your team connected, wherever they are, whether on the road or around town. iPass offers:

- ▶ Unlimited access on unlimited devices. We give you unlimited data for unlimited time on unlimited devices.
- ▶ Largest global Wi-Fi network. With 50 million Wi-Fi hotspots and more than 160 network partners worldwide, iPass keeps you connected in airports, airplanes, hotels, train stations, trains, public venues, your local café and more.
- ▶ The best Wi-Fi hotspots for your needs. iPass SmartConnect technology identifies and rates hotspots based on factors such as signal strength, speed, bandwidth availability, and connection success rate. Then iPass SmartConnect automatically connects you to the best hotspot based on your needs.
- ▶ Secure connections. iPass offers three layers of security: One-time Password keeps user credentials hidden; information within the app is

## ABOUT IPASS

iPass is a leading global provider of mobile connectivity, offering convenient, secure, always-on Wi-Fi access on any mobile device. Built on a software-as-a-service (SaaS) platform, the iPass cloud-based service keeps its customers connected by providing unlimited Wi-Fi connectivity on unlimited devices. iPass has 50 million hotspots in more than 100 countries, at airports, hotels, train stations, convention centers, outdoor venues, inflight, and more. Using patented technology, iPass SmartConnect takes the guesswork out of Wi-Fi, automatically connecting customers to the best hotspot for their needs. Customers simply download the iPass app to experience unlimited, everywhere, and invisible Wi-Fi.

encrypted; and any data that is transferred between the app and the iPass platform is secured. iPass supports the use of end-to-end corporate VPNs, or you can use the iPass Last Mile VPN to keep your company data safe where it is most vulnerable.

- ▶ Ease of use. There's no need to look for a free hotspot or enter credentials in order to connect. iPass makes it easy by connecting you automatically.
- ▶ Easy administration and deployment. Our dashboard lets you run common reports or perform routine tasks from your desktop or mobile device. And iPass doesn't require extra IT resources to deploy, either in terms of manpower or budget.
- ▶ Predictable pricing. No more data roaming charges or fees for going over data limits. iPass offers one flat fee per month per user.
- ▶ Centralized billing. With all your connectivity costs in one place, you have better visibility into your costs and the ROI.
- ▶ The most popular platforms. iPass is available on iOS, Android, Mac, and Windows.
