

Global Mobile Connectivity

The problem:

- ▶ **Buying Wi-Fi services on demand is inefficient:**

Buying Wi-Fi on demand requires a new password, a new username, and new credit card information each time you log in.

- ▶ **Locating a usable Wi-Fi network takes effort:**

When your team needs to access Wi-Fi outside of the office, they have to search to find locations with Wi-Fi connectivity.

- ▶ **Using public Wi-Fi is not secure:**

Using public Wi-Fi networks exposes your company's data and devices to hackers, man-in-the-middle attacks, and malware. And with BYOD policies, your team is accessing company information on devices that may not be up to your company's security standards.

- ▶ **Mobile plans have unpredictable pricing:**

When your team goes over its data limits, you pay heavily. You also have to pay higher rates on cellular plans for international data and voice roaming when your team travels.

- ▶ **Administering cloud-based services can be difficult:**

Cloud-based services are rarely easy or intuitive to administer.

ABOUT IPASS

iPass is a leading global provider of mobile connectivity, offering convenient, secure, always-on Wi-Fi access on any mobile device. Built on a software-as-a-service (SaaS) platform, the iPass cloud-based service keeps its customers connected by providing unlimited Wi-Fi connectivity on unlimited devices. iPass has 50 million hotspots in more than 100 countries, at airports, hotels, train stations, convention centers, outdoor venues, inflight, and more. Using patented technology, iPass SmartConnect takes the guesswork out of Wi-Fi, automatically connecting customers to the best hotspot for their needs. Customers simply download the iPass app to experience unlimited, everywhere, and invisible Wi-Fi.

The solution:

Let iPass keep your team connected wherever they are, whether on the road or around town. iPass is a cloud-based service that offers seamless, secure, intelligent connectivity, powered by the world's largest Wi-Fi network.

- ▶ **iPass makes connecting easy:** iPass saves time with One-click activation. In addition, iPass SmartConnect automatically chooses the best hotspot based on your usage needs. iPass SmartConnect rates hotspot performance and reliability, blacklisting those that do not meet iPass' usage standards and assigning premium hotspots to heavy users.
- ▶ **iPass keeps employees connected wherever they go:** iPass has 50 million hotspots everywhere your team needs to be: airports, airplanes, train stations, trains, hotels, public venues, cafés and more.
- ▶ **iPass keeps your company's data secure:** iPass supports the use of corporate virtual private networks (VPNs), or you can use the Last Mile VPN to keep your data safe where it is most vulnerable. And with One-time Password, you never have to expose your credentials in order to connect.
- ▶ **iPass keeps your costs predictable:** iPass Unlimited offers predictable, per user, per month pricing for unlimited access on unlimited devices.
- ▶ **iPass makes administration easy:** iPass' user-friendly dashboard enables easy administration. Administrators can access reports and perform tasks from their desktops or their mobile devices.
