iPass

iPass SmartConnect SDK

The iPass SmartConnect Software Development kit (SDK) provides the tools to build adaptive network selection applications for smartphones, tablets, and laptops. Developers can access iPass core technologies to activate, authenticate, connect, and create custom interfaces for presenting and selecting Wi-Fi networks.

Applications built using the iPass SDK have instant and secure access to any of the iPass 50 million hotspots. The SDK is designed for enterprises, operators and solution vendors seeking to leverage iPass wireless connectivity technology in their applications.

RESTRICTIONS AND LIMITATIONS

▸ Supported platforms include iOS 9.x and Android 5.x

▸ Autoconnect is not supported on iOS

▸ Version 1 of the iPass SDK will be available in Q1 of 2016

PLATFORM SUPPORT DESCRIPTION

▸ iOS 9.x and above

▸ Android 5.x and above

As Seamless as Cellular: iPass SmartConnect

Analyzing network performance and response time, iPass SmartConnect aggregates anonymous usage data using predictive analysis to determine the best Wi-Fi locations. iPass SmartConnect uses patented technology to analyze Service Quality Management (SQM) records and various other data to ensure your employees have a quality WI-FI experience while on the go. All authentication traffic is encrypted over secure connections via SSL and TLS and the iPass SDK supports Radius, GIS, WISPr, CG, and GC authentication protocols.

ABOUT IPASS

iPass delivers global, mobile connectivity as a hosted cloud service, connecting its customers with the people and information that matter the most on all of the devices they choose to carry: smartphones, tablets and laptops. iPass (NASDAQ: IPAS) is the world's largest Wi-Fi network. By the end of 2015, iPass will have 50 million hotspots in airports, hotels, airplanes and public areas in more than 120 countries across the globe. In the rapidly changing technology of Internet connectivity, iPass is the industry pioneer in ensuring businesses have unlimited access to unlimited content.

iPass® is a registered trademark of iPass Inc. Wi-Fi® is a registered trademark of the Wi-Fi Alliance. All other trademarks are owned by their respective owners.

Key features/benefits

▸ Easily add Wi-Fi connectivity to any application, letting publishers focus on their brand

▸ Instant access to the most common Wi-Fi authentication protocols

▸ iPass SmartConnect is the world's smartest Wi-Fi connection manager and optimizes connections

▸ Easy user API management

▸ Admin dashboard enables administrative users to perform routine tasks such as add or delete users and view common reports on users, devices, and usage

▸ iPass SmartConnect gives unprecedented visibility into the Wi-Fi universe

▸ Onboarding and activation: Creates and manages credentials for new iPass end users
